

HEDIS® and Quality Education

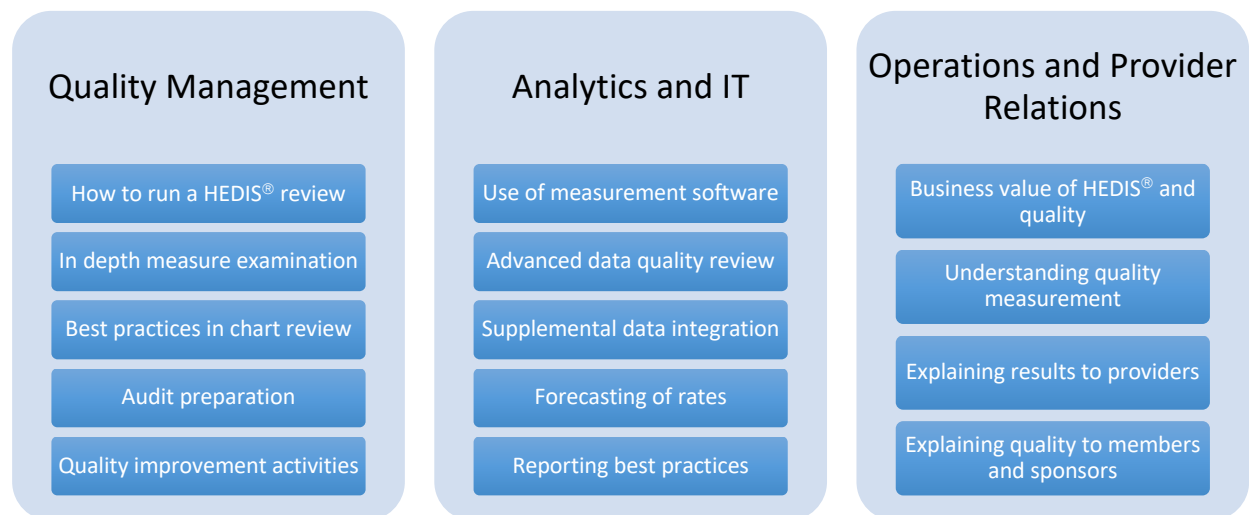

Build Your Team's Quality Expertise

As quality measurement becomes both more difficult and more important, completing the HEDIS® review requires more staff from more areas of a company. With quality management skill sets being a limited commodity, it is much more efficient to train existing employees to learn new skills and improve existing ones. Health Data Decisions provides expert education programs and ongoing support and mentoring that can help keep your team at the top of their abilities.

Targeted Education

Because organizations vary, there is no one-size-fits-all approach. Health Data Decisions will diagnose your education needs and create a customized program from a wide-ranging catalog of topics. Each topic can be customized to job function so that both the selection and depth of topics match the needs of the audience.

Training Modeling and Mentoring

Connecting with an attendee is necessary to ensure comprehension and Health Data Decisions always recommends that initial training sessions occur in person. To help maintain and enhance learning over time an ongoing mentoring program is available, that includes:

- Topical webinars
- Evaluation of skills
- Technical assistance
- Direction on future learning topics

About Health Data Decisions

Health Data Decisions is a Massachusetts-based health analytics firm founded in 2008. We offer strategic data solutions for health plans and vendors, bringing broad expertise in data management and analytics, medical economics, risk adjustment, HEDIS®, CMS 5-Star, regulatory reporting, and systems strategy. Join us for our free monthly HEDIS® webinar series. Send a message to webinar@healthdatadecisions.com for instructions or receive announcements as part of our LinkedIn HEDIS® Improvement Forum.

HEDIS® is a registered trademark of the National Committee for Quality Assurance (NCQA)
